# EXPERIMENT 6

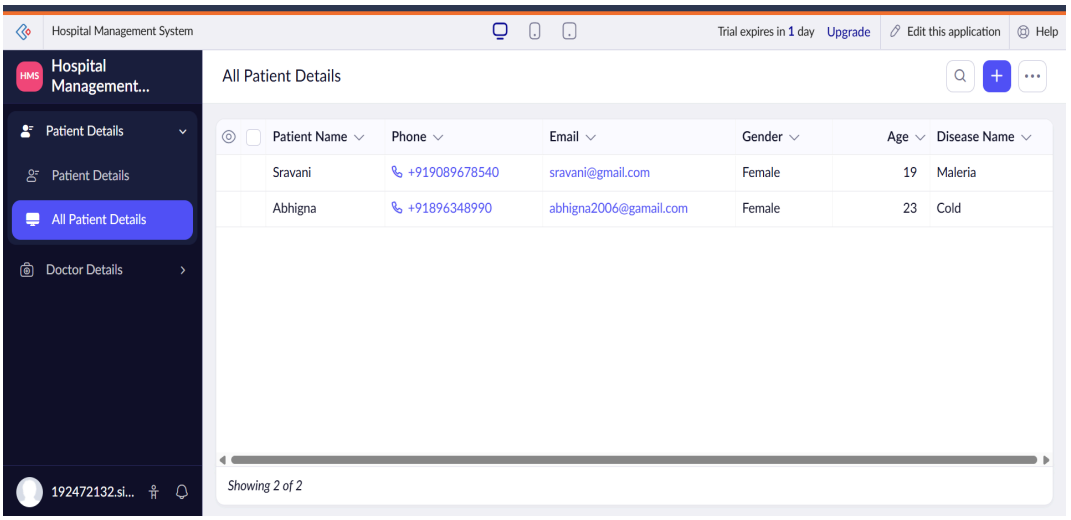
## Hospital Management System

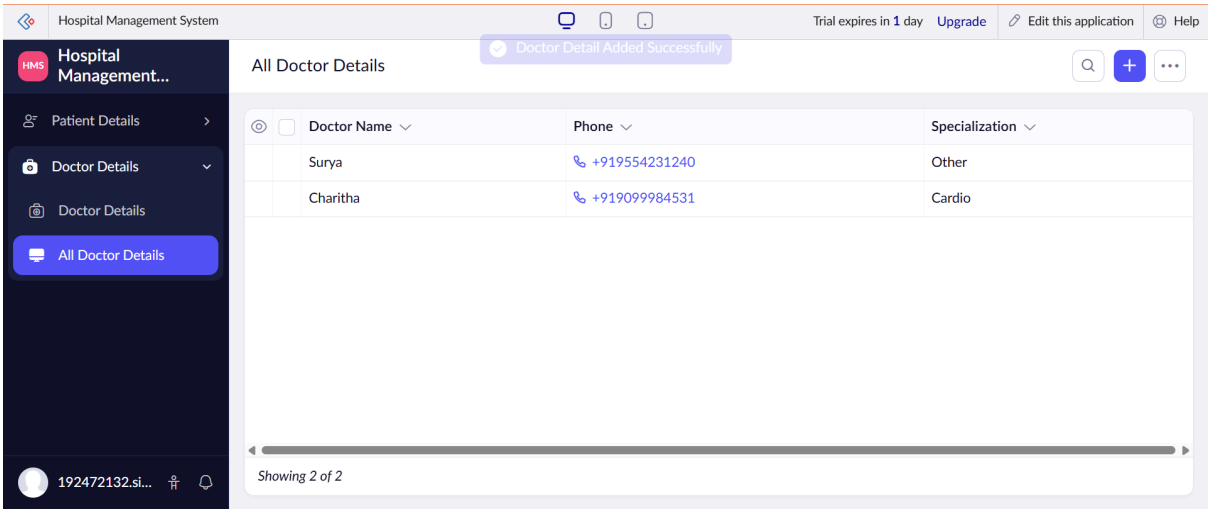
**Aim:** To design and develop a cloud-based Hospital Management System using Zoho Creator.

**Procedure:**

1. Logged into Zoho Creator and created a new application named Hospital Management System.
2. Created a Patient Details Form and added fields such as Patient Name, Age, Gender, Contact, Email, Address, and Disease.
3. Created a Doctor Details Form with fields like Doctor Name, Specialization, Contact, and Availability.
4. Configured field properties by setting mandatory fields and appropriate data types.
5. Saved all forms and allowed Zoho Creator to generate reports automatically.
6. Tested the application by entering sample patient, doctor data.

**Output:**





**Result:** A cloud-based Hospital Management System was successfully developed using Zoho Creator.
